

WYC:imp 60195 12/9/02

PATENT

entities; receiving the broadcast data signals in a portable communication device; separating the hidden information from the information content in the received broadcast data signals and presenting the hidden information to a user to facilitate a user selection, the user selection being associated with the hidden information; wirelessly transmitting the user selection to a revenue determination center; determining a revenue share amount for each of the plurality of entities based upon the broadcast data signals and the user selection; and allocating the determined revenue share amount to each of the plurality of entities.

B1
88. (New) The method of sharing broadcast revenue according to claim 11, wherein the separating includes converting the received broadcast data signals into electrical signals and extracting the hidden information from the electrical signals.

89. (New) The method of sharing broadcast revenue according to claim 11, wherein the wirelessly transmitting includes transmitting the user selection to a wireless network resource, the wireless network resource being coupled, at least indirectly, to the revenue determination center.--

REMARKS

After entry of the foregoing amendment, claims 1-89 are pending in the application.

New claims 77-89 are copied from published application 2001/0055391 (SN 09/805,679) in order to preserve applicant's rights to provoke an interference.
